

# LET'S SHAPE SECURITY TOGETHER AT GSIS 2026.

9-10  
December  
2026

In 2026, the Global Security & Innovation Summit (GSIS) will once again bring together the people shaping security in times of geopolitical tension: decision-makers, industry leaders, technology providers, founders, innovators, and experts. The combination of a high-level conference, a curated exhibition, and meaningful exchange and collaboration makes GSIS an international platform where discussion leads

to concrete, innovative solutions. Unlike formats that primarily shape the debate, GSIS combines strategic dialogue with technological innovation and collaboration. Jointly initiated by Hamburg Messe and Congress and the International Institute for Strategic Studies (IISS), the event in Hamburg sets important impulses for the key security challenges of our time.

## GSIS at a glance

International platform for **security, resilience and innovation**

Combination of a **high-level security policy conference and an innovation and technology exhibition**

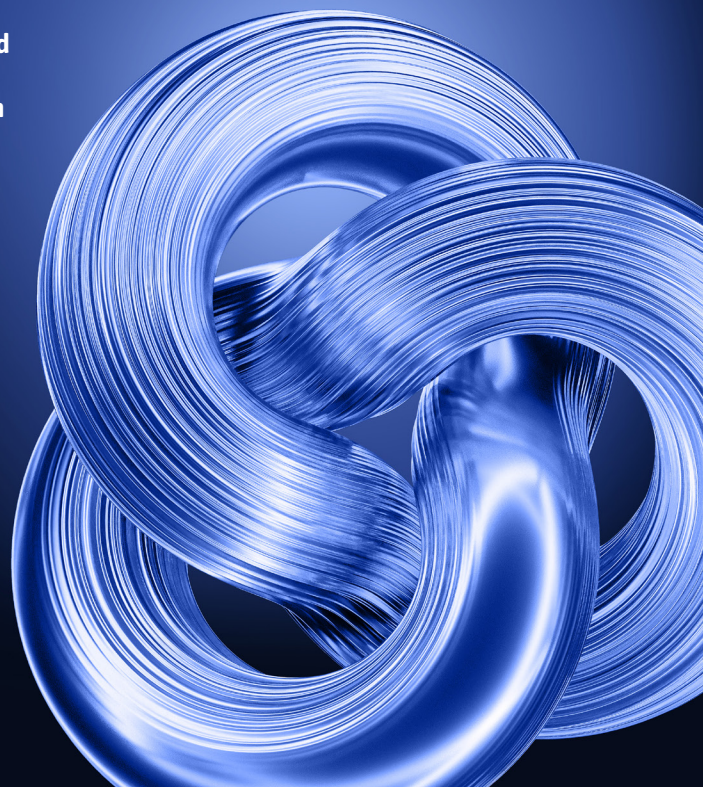

Focus on **future technologies and concrete solutions**

Location:  
**CCH-Congress-Center Hamburg**

Curated environment for **exchange, visibility and business development**

## Key topics at GSIS 2026

DefenceTech, autonomous systems and robotics

SpaceTech and satellite infrastructure

Critical infrastructure and resilience technologies

Artificial intelligence and cloud infrastructure

Biotechnology

Cybersecurity and quantum technology

## Your benefits as an exhibitor

Direct access to top international decision-makers, delegates and experts

Live presentation of products, technologies and solutions within an integrated expo and conference setting

Targeted touchpoints across conference, exhibition, side events and exclusive networking formats

High visibility and footfall due to central placement within visitor flow

Premium positioning in a high-quality international environment

## Exhibit where meaningful exchange happens.

The GSIS exhibition is directly integrated into the central networking and lounge area, making the exhibition space a natural meeting point for delegates, experts and professional visitors.

# GSIS 2025 opened with strong momentum.

More than 300 invited thought leaders and decision-makers

A format with strong relevance and significant potential

40 international speakers from politics, business, and technology

Supported by partners such as Airbus, Microsoft, and Vodafone

## EUROATLAS

*“As an exhibitor at GSIS, we value the combination of strategy, policy and technology that IISS, together with Hamburg Messe and Congress, has created in this forum.”*

## Airbus

*“The Global Security and Innovation Summit is a valuable and distinctive format. Bringing together political leaders, industry representatives, technology pioneers and security experts creates the necessary understanding to move forward and develop practical, collaborative approaches to shared challenges.”*
